

**MAGEE-  
WOMENS**  
RESEARCH INSTITUTE  
& FOUNDATION

**WE SEE A BETTER, HEALTHIER WORLD IN WHICH WOMEN'S HEALTH HAS THE SCIENTIFIC PROMINENCE AND CULTURAL STATUS IT DESERVES.**

**With more than 300 world-class scientists and staff**

**Working in more than 30 areas of research**

**MWRI is the largest independent U.S. research institute focused solely on women's health research and reproductive biology.**

### KEY AREAS OF RESEARCH

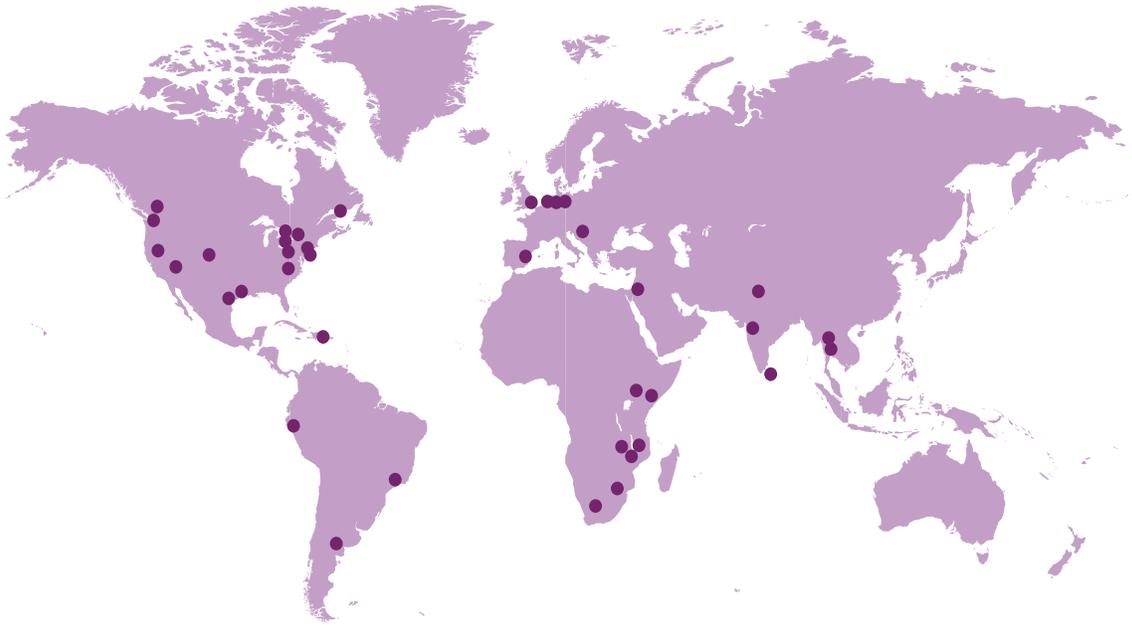

**Reproductive Medicine | Pregnancy and Newborn Medicine | Infectious Diseases | Gynecology  
Reproductive Endocrinology and Fertility | Women's Cancers | Women's Wellness**

### NOTABLE RESEARCH

- Decreasing the spread of HIV in Africa through our Microbicide Trials Network where 11,000 women are enrolled in trials in 6 countries
- Creating revolutionary urogynecological treatments for debilitating prolapse
- Offering new hope for young cancer patients facing permanent infertility from chemotherapy for having biological children someday
- Identifying biomarkers for the earlier detection of gynecologic cancers
- Improving health care and outcomes for expectant mothers addicted to opioids
- Seeking to understand the underpinnings of early human development, and what the impact of the first 9 months of life is on the rest of the lifespan

## OUR GLOBAL COLLABORATION

Laboratory research and clinical trials are connected to major institutions, medical centers and universities all over the world.

### WE ARE CHANGING THE WAY THE WORLD TREATS WOMEN.

We're making groundbreaking discoveries every day—in the fields of cancer, heart disease, fertility, HIV, pregnancy and more. The potential is endless, and anything is possible when the country's largest women's research institute partners with a world-class women's hospital, UPMC Magee-Womens Hospital.

### BE THE SPARK

Donations like yours fund research for an enormous range of women's issues. Help us close research gaps and target unmet needs. You can support essential aspects of our work that federal grants don't cover—including promising new studies that could lead to the next big breakthrough.
