

14TH ANNUAL
**WCRC
FLY FISHING
CLASSIC**

**THURSDAY, AUG. 28 &
FRIDAY, AUG. 29, 2025**

HOMEWATERS CLUB, SPRUCE CREEK, PA

WELCOME

from the Women's Cancer Research Center

The Women's Cancer Research Center (WCRC) was developed in 2010 as a unique collaboration between the UPMC Hillman Cancer Center and Magee-Womens Research Institute. UPMC Hillman is a recognized leader in cancer care and research and Magee-Womens is the nation's largest independent research institute dedicated to women's health.

The close proximity of Magee-Womens, UPMC Hillman, and UPMC Magee-Womens Hospital fosters unique opportunities for collaboration among investigators and provides a rich environment for educational and training programs.

The WCRC is co-directed by Ronald Buckanovich, MD, PhD, and Steffi Oesterreich, PhD, and comprised of highly specialized faculty who are actively involved in women's cancer research.

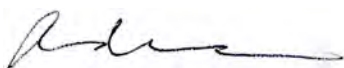

Today, ample opportunities exist for advancing medicine in women's cancers. With recent breakthroughs in genomic discovery, we now have the tools to identify biomarkers for cancer risk, severity, and prognosis. Through large-scale clinical trials, Magee-Womens investigates ovarian and other pelvic cancers, examines the causes, prevention, and treatment of breast cancer, and assesses the impact cancer has on a woman's quality of life.

Philanthropic support bolsters cutting-edge research conducted at the WCRC, which makes a difference in the lives of countless women and their families.

We are delighted to invite you to the **14th Annual WCRC Fly Fishing Classic** at the HomeWaters Club in Spruce Creek, Pennsylvania, on **August 28-29**. We hope that you will consider sponsoring or entering a team at this year's event and partner with us to find a cure for women's cancers.

We look forward to joining you in this competition while raising money for a worthy cause.

Sincerely,

Ronald J. Buckanovich, MD, PhD

Steffi Oesterreich, PhD

Co-Directors, Women's Cancer Research Center

ABOUT THE WOMEN'S CANCER RESEARCH CENTER

The Women's Cancer Research Center's (WCRC) mission is to reduce the incidence and death from women's cancers. This mission is achieved by fostering basic, translational, and clinical research aimed at translating novel discoveries into improved patient care.

Major research areas include:

- Mechanisms of cancer initiation and progression
- Hormone receptor action and resistance to hormone therapy
- Prevention, risk assessment, and reduction
- Molecular profiling of early disease and progression
- Development and testing of new diagnostic, predictive, and prognostic biomarkers
- Identification and testing of new targeted therapies
- New imaging techniques, and integration into screening programs
- Research on normal development of breast and ovaries

A woman is shown from the back, wearing a white Adidas baseball cap, a blue t-shirt, and grey fishing overalls. On her back, there is a large, colorful thermal patch with a rainbow gradient. She is holding a fishing rod with a green line. The background is a blurred green forest.

WOMEN'S CANCERS FACTS & FIGURES:

GYNECOLOGIC CANCERS

- Each year more than 98,000 U.S. women are diagnosed with gynecologic cancers.
- Gynecologic cancers occur in a woman's reproductive organs such as the cervix, ovaries, uterus, fallopian tubes, vagina, and vulva.

UPMC MAGEE GYNECOLOGIC CANCERS FAST FACTS:

Each year at UPMC Magee, 700 gynecologic cancer patients are diagnosed or treated.

- 1,200+ admissions and surgeries
- 3,300 chemotherapy treatments
- 170 new radiation oncology patients
- The Ovarian Cancer High Risk Program provides individual assessment, counseling, testing, and surveillance of women throughout the region.

BREAST CANCER

- Each year more than 300,000 U.S. women are diagnosed with breast cancer annually.

UPMC MAGEE BREAST CANCER FAST FACTS:

Each year at UPMC Magee, over 1,100 breast cancer patients are diagnosed or treated.

- 115,000 breast imaging patients
- 10,000 chemotherapy visits
- 175 new radiation oncology patients
- 1,700 breast admissions/surgical cases
- 39 clinical trials available, with an additional 20 pending trial
- 800 women are seen through the Breast Cancer High Risk Program, which provides assessment, counseling, and surveillance to women throughout the region.
